

Microprocessor Controller, Huber

Plug & Play technology and a 3-year warranty: in the event of service or a free program update, the Huber thermostat control electronics can be easily exchanged. Inconvenient discharging and dismantling of the thermostat is not required.

The new Compatible Controllers comes in 3 versions. Special feature: all Compatible Controllers are interchangeable. As such, the Compatible Control CC1 base unit can be equipped with convenience options (e.g. programmer function) (CC2) or even be made dialog-capable (CC3) by means of a simple controller exchange:

Controller CC1 – the basic unit:

Digital display, Easy Control, plain text, menu-controlled, calibratable, target value limit, visual and audible alarm, programmable automatic power failure detection, administrator level/user level

Controller CC2 – the convenience unit:

Like the Controller CC1, plus:

Ramp function, programmer function with five steps, master controller, connection for an external Pt100 gauge

Controller CC3 – the dialog-capable unit:

Like the Controller CC2, plus:

Programmer function with 50 steps, RS-232 and RS-485 digital interfaces, analog interface (4 to 20 mA)

Article	Order No.
① Compatible Control CC1	46 59 16401
② Compatible Control CC2	46 59 16402
③ Compatible Control CC3	46 59 16403
External Pt100	46 59 06138
