

Deepwell Plates 96 and 384, Eppendorf

With the RecoverMax Well Design, Eppendorf sets new standards for Deepwell plates. The new Well geometry enables quick pipetting, mixing and centrifuging of the specimen. This makes it possible to shorten both manual and automatic work processes. The coloured frames with alphanumeric labelling make orientation easier - they make work quick and safe.

The plates are available in Standard, Sterile, DNA and Protein LoBind quality and in four different volumes. Easy stackability, diverse cover options, high chemical resistance and temperature consistency provide a wide range of application.

The plates meet the requirements according to SBS¹⁾, IVD, EN ISO 9001 and EN ISO 13485. Charge-specific certificates can be viewed at www.eppendorf.de/zertifikate.

Number of Wells: 96
Volume of Work: 30-550 µl
Total volume: 700 µl
Dimensions (W×H×D): 127,8 × 85,5 × 27,1 mm

Article	Order No.	PU pc/Pack
① Deepwell plate 96/500 µl, standard, white	10 69 01101	40
Deepwell plate 96/500 µl, standard, yellow	10 69 01110	40
Deepwell plate 96/500 µl, standard, red	10 69 01128	40
Deepwell plate 96/500 µl, standard, green	10 69 01136	40
Deepwell plate 96/500 µl, standard, blue	10 69 01144	40
Deepwell plate 96/500 µl, sterile, white	10 69 02108	40
Deepwell plate 96/500 µl, sterile, yellow	10 69 02116	40
