

Extraction Thimbles, IDL

Extraction thimbles made of cellulose for use with a number of extractor systems (e.g. Soxhlet).

Can be used for many types of extractions, for example determination of fat content in food, paints, varnishes etc. Made of binderless, highly pure cellulose.

By their high porosity, the extractor thimbles ensure fast flow.

The dimensions refer to the inner diameter and out length of the thimbles.

Packed in cardboard boxes of 25 pc. each!

ID × H mm	Order No.	PU pc/Pack
22 × 80	10 00 18108	25
