

Reaction Vessels, Rettberg

Reaction vessels with temperature stabilizing jacket, borosilicate glass 3.3, with special profiled tube with solid baffle edges in the inside of the vessel for better mixing of the media, cylindrical, Schott flat flange with annular groove, without graduation, tangential temperature stabilizing connections with thread GL 18 (for attaching a PP hose connector with union cap for temperatures up to +140°C).

① Flat bottom, without bottom drain

Vol. ml	flange DN	O.D. mm	I.D. mm	temp. H mm	Total H approx. mm	Order No.
100	60	90	60	70	140	13 42 17024
250	60	90	60	125	190	13 42 17036
500	100	140	100	120	200	13 42 17044
1000	100	140	100	200	280	13 42 17054

② Round bottom, with bottom drain valve, no empty space

Vol. ml	flange DN	O.D. mm	I.D. mm	temp. H mm	Overall H without bottom drain mm	Order No.
100	60	90	60	70	140	13 42 17124
250	60	90	60	125	190	13 42 17136
500	100	140	100	120	200	13 42 17144
1000	100	140	100	200	280	13 42 17154
