

HACCP is a test system by means of risk analysis in the food industry, which will become the standard in the coming years. This shoe has already been tested micro-biologically and tested according to Baumgart (HACCP-conform).

Lorica is a water-resistant, washable but still breathable micro-fibre.

The insole ensures air circulation under the whole foot and transports humidity away from the foot. The foot remains cooler and dryer.

This shoe offers all the convenience of a professional shoe, such as:

- Anti-skid PU-sole according to DIN 4843 part 100 with self-cleaning profile
- Lining Air-Mesh
- Insole exchangeable, with air cushion knobs
- Sprain protection for high side stability
- Flex zone to support the natural rolling motion
- Torsion joint made of TPF
- Shock-absorbing PU-intermediate sole to relieve the spine
- Asymmetric heel for natural positioning of the foot
- Natural formed steel cap according to DIN EN 12568 (200 Joule)
- CE, EN ISO 20345:2004
