

HPLC column storage system, Altmann Analytik

Padded steel cabinet for up to 30 HPLC columns of max. 300 mm length each. The drawers of the cabinet are foam-padded. Thus, the columns are protected from impacts and contamination, and are easy to put in and remove

- Stackable and thus easy to extend – the optional stacking equipment allows for storage of additional columns
- For HPLC columns of max. 30 cm length – also accommodates lengths of 5 cm, 12.5 cm, 15 cm and 25 cm
- Robust, solid casing made of 100% steel with chrome-plated drawer handles

Technical data:

Dimensions (W×H×D): 279 × 325 × 408 mm

Weight: loaded 12 kg, empty 10.5 kg
