

Packing Tester, Aerne Analytic

For leakage testing of all types of packaging. The test vessel is filled with water and the packaging to be tested is placed under the height-adjustable immersion plate. Once a vacuum is applied, any leakage is indicated by raising air bubbles.

Type	Specification	Useful dimensions Ø × H cm	Order No.
VT150	Packing tester, analogue	19 × 15	10 64 03150
VT250	Packing tester, analogue	19 × 25	10 64 04250
